Section 1 — Technical Architecture

This section covers the database schema, payment flow, and API documentation that forms the backbone of the CharityHub platform, built on Laravel + PHP with Stripe (sandbox) as the payment gateway.

1.1 Database Schema

CharityHub uses a relational database structured for financial integrity, auditability, and scalability. Below is the full table reference followed by screenshot placeholders for each model.

Table	Purpose	Key Columns
users	Stores admin, donor, and volunteer accounts. Roles managed via Spatie permission package.	<code>id, name, email, role, email_verified_at, created_at</code>
campaigns	Core fundraising initiatives. Tracks financial goals, deadlines, and real-time raised amounts.	<code>id, title, description, goal_amount, raised_amount, end_date, status</code>
donations	Individual transactions with full lifecycle tracking (pending → confirmed → failed).	<code>id, user_id, campaign_id, amount, currency, status, idempotency_key, stripe_pi_id</code>
charity_subscriptions	Recurring monthly/yearly donations linked to Stripe Subscription objects.	<code>id, user_id, campaign_id, plan, stripe_subscription_id, status, next_billing_at</code>
ledger_entries	Immutable double-entry log for every confirmed financial transaction (audit trail).	<code>id, donation_id, type, amount, currency, created_at</code>
volunteer_schedules	Tracks volunteer shifts with conflict detection and completed-hours logging.	<code>id, user_id, campaign_id, shift_start, shift_end, status, hours_logged</code>
impact_reports	Published campaign outcome summaries with geodata for map rendering.	<code>id, campaign_id, title, content, beneficiary_count, location_lat, location_lng</code>

Database Screenshots

Insert Eloquent model / migration screenshots below for each table:

1.2 Payment Flow Diagram

The following sequence describes the complete Stripe payment lifecycle — from donor intent through webhook confirmation and certificate delivery. All amounts are processed via Stripe Test Mode (no real charges).

#	Actor	Action
1	Donor	Submits donation form with amount, campaign_id, and idempotency_key
2	CharityHub App	Validates request → calls Stripe API: CreatePaymentIntent
3	Stripe Gateway	Returns client_secret for front-end Stripe.js confirmation
4	CharityHub App	Renders secure checkout iframe with the client_secret
5	Donor	Enters card details and confirms payment via Stripe.js
6	Stripe Gateway	Processes payment → fires webhook: payment_intent.succeeded
7	CharityHub App	Verifies webhook signature (STRIPE_WEBHOOK_SECRET)
8	CharityHub App	Updates donation status → Confirmed
9	CharityHub App	Creates immutable LedgerEntry for audit trail
10	Queue Worker	Dispatches DonationReceived event → generates PDF certificate (DomPDF)
11	Queue Worker	Emails tax certificate to donor with QR verification code

1.3 API Documentation

API documentation is auto-generated by the Scribe package from controller docblocks. All endpoints require Content-Type: application/json and Accept: application/json headers.

i To view live docs: navigate to YOUR_APP_URL/docs in the browser.

i To regenerate: run php artisan scribe:generate in the terminal.

Method	Endpoint	Description	Group
POST	/api/auth/register	Register a new donor account	Auth
POST	/api/auth/login	Authenticate and receive Bearer token	Auth
POST	/api/auth/logout	Invalidate current session token	Auth
GET	/api/campaigns	Public listing of all active campaigns	Campaigns
GET	/api/campaigns/{id}	Get full details of a single campaign	Campaigns
POST	/api/donations	Initiate one-time donation — returns client_secret for Stripe.js	Donations
GET	/api/donations/{id}	Get donation status for the authenticated donor	Donations

POST	/api/subscriptions	Create recurring monthly/yearly donation	Subscriptions
DELETE	/api/subscriptions/{id}	Cancel a recurring subscription	Subscriptions
GET	/api/donors/export	Export authenticated donor's full donation history	Donors
POST	/api/volunteers/register	Register as a volunteer for a campaign shift	Volunteers
GET	/api/volunteers/schedules	Retrieve scheduled volunteer shifts	Volunteers
GET	/api/impact-reports	List published impact reports	Reports

POST /api/donations — Detailed Spec

Initiates a one-time donation and returns a Stripe client_secret for front-end confirmation.

Parameter	Type	Rules
campaign_id	string	Required. Valid UUID matching an existing campaign record.
amount	integer	Required. Minimum value: 100 (smallest Stripe unit). Example: 96
currency	string	Optional. Exactly 3 characters (ISO 4217). Example: usd, gbp, egg
idempotency_key	string	Required. Valid UUID generated per request. Prevents duplicate charges.

Example Request — POST /api/donations

```
curl --request POST "http://localhost/api/donations" \
--header "Content-Type: application/json" \
--header "Accept: application/json" \
--header "Authorization: Bearer {token}" \
--data "{
  \"campaign_id\": \"66529e01-d113-3473-8d6f-9e11e09332ea\",
  \"amount\": 500,
  \"currency\": \"usd\",
  \"idempotency_key\": \"c2cdda66-81e5-3060-a4eb-049b4a810d76\"
}"
```

GET /api/donations/{id} — Detailed Spec

Returns the current status of a donation for the authenticated donor.

Parameter	Location	Description
id	URL path	The UUID of the donation record. Example: consequatur

GET /api/campaigns — Detailed Spec

Public endpoint. Returns paginated list of all active campaigns. No authentication required.

```
curl --request GET "http://localhost/api/campaigns" \  
      --header "Content-Type: application/json" \  
      --header "Accept: application/json"
```

POST /api/volunteers/register

Registers the authenticated user as a volunteer for a campaign shift. Conflict detection prevents double-booking.

```
curl --request POST "http://localhost/api/volunteers/register" \  
      --header "Content-Type: application/json" \  
      --header "Authorization: Bearer {token}"
```

GET /api/volunteers/schedules

Returns the authenticated volunteer's upcoming and past shifts.

```
curl --request GET "http://localhost/api/volunteers/schedules" \  
      --header "Authorization: Bearer {token}"
```

Section 2 — User & Operations Manuals

This section covers two audiences: donors using the public-facing CharityHub platform, and administrators managing the platform via the Filament Admin Panel.

2.1 Donor-Facing User Guide

Welcome to CharityHub — a global community dedicated to radical transparency. Every pound you donate is traceable from your wallet to the person who needs it most.

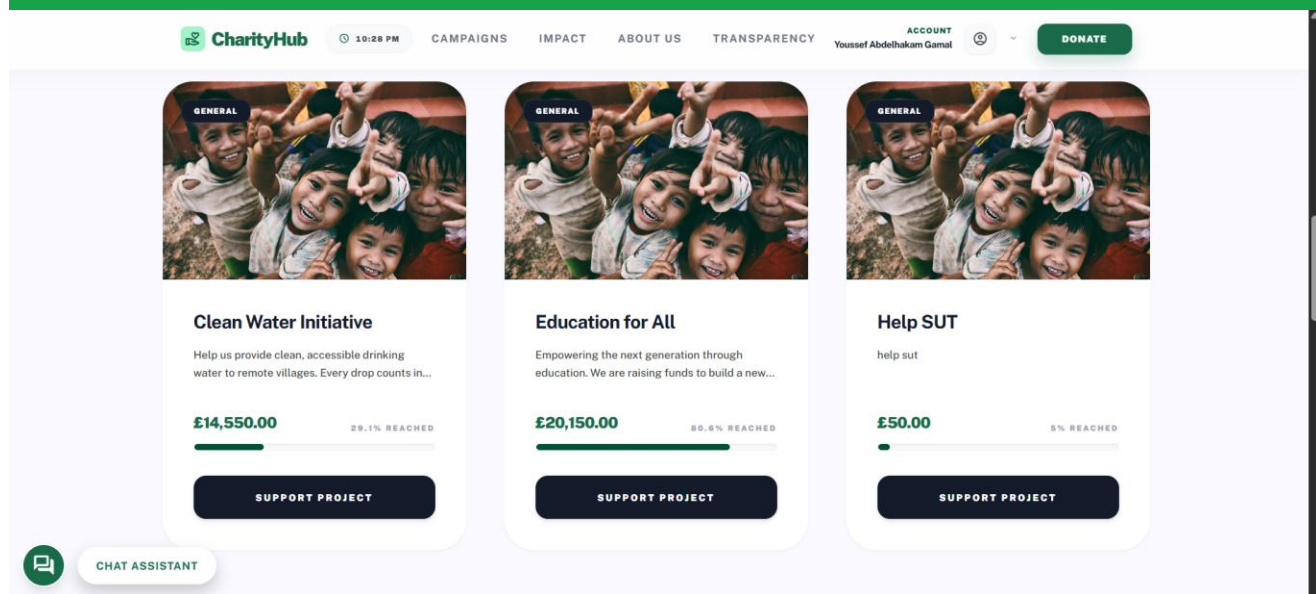

Getting Started

- **Visit the CharityHub website and click Sign Up to create your free donor account.**
- Verify your email address by clicking the link sent to your inbox.
- Complete your profile to enable donation certificates and tax receipts.

Finding & Browsing Campaigns

- **Click Browse Campaigns from the homepage or the top navigation bar.**
- Each campaign card shows: title, cause category, funds raised, goal, and deadline.
- Click a campaign to view its full description, impact reports, and donation leaderboard.
- Use filters to sort campaigns by category, urgency, or funding progress.

Campaigns Listing Page Screenshot

Making a Donation

1. Open the campaign page and click the Donate Now button.
2. Select or enter your donation amount (minimum: 1 unit of your chosen currency).
3. Choose One-Time or Recurring (monthly / yearly).
4. Enter your card details in the secure Stripe checkout form.
5. Click Confirm Donation. An idempotency key is generated automatically to prevent double charges.
6. You will be redirected to a success screen and receive a confirmation email.

Donation Checkout Flow Screenshot

The screenshot displays the CharityHub donation checkout process. The top navigation bar includes the CharityHub logo, a clock icon showing 10:31 PM, and links for CAMPAIGNS, IMPACT, ABOUT US, and TRANSPARENCY. The user's account is logged in as Youssef Abdelhakam Gamal, with a DONATE button.

The main content area is divided into two columns. The left column, titled "Support this Campaign", features a "Donate Now" button, a "Confirm Donation" button, and a "Make my donation anonymous" checkbox. The right column shows the "FUNDRAISING STATUS" with a progress bar indicating 17.5% REACHED towards a TARGET GOAL of £1,000.00. Below this, there is a "Donate Now" button and a "SECURE STRIPE CHECKOUT" label. At the bottom right, there is a section titled "AMPLIFY THIS PROJECT" with social sharing icons.

The success screen at the bottom features a green checkmark icon, the text "Thank you, Youssef!", and a confirmation message: "Your contribution of £25 has been processed and is now visible on our public ledger." Below this, there are two buttons: "Make Another Donation" and "VIEW REAL-TIME LEDGER".

Certificates & Tax Receipts

- A verifiable PDF certificate is automatically emailed upon each successful donation.
- Each certificate includes a QR code that links to the transaction record for verification.
- Download past certificates any time from your Donor Dashboard under My Donations.
- Certificates serve as official tax receipts for applicable jurisdictions.

Donor Dashboard — My Donations & Certificates Screenshot

The screenshot displays the CharityHub Donor Dashboard for Youssef Abdelhakam Gamal. The dashboard includes a navigation bar with links to CAMPAIGNS, IMPACT, ABOUT US, and TRANSPARENCY. The main content area shows a welcome message and three summary cards: TOTAL DONATED (£102,397.00), CAUSES SUPPORTED (4), and CERTIFICATES (13). Below these is a 'Donation History' table with columns for CAMPAIGN, DATE, AMOUNT, STATUS, and ACTIONS. The table lists three donations to the 'Help SUT' campaign, all confirmed, with amounts of £100.00 and £25.00. A 'CHAT ASSISTANT' button is visible in the bottom left corner.

CAMPAIGN	DATE	AMOUNT	STATUS	ACTIONS
Help SUT 019E1DAD-173B-723F-8907-5A40C5244404	May 12, 2026	£100.00	CONFIRMED	Download Certificate
Help SUT 019E1DAD-C310-7019-A63F-312095AC3B9F2	May 12, 2026	£25.00	CONFIRMED	Download Certificate
Help SUT 019E1DAD-173B-723F-8907-5A40C5244404	May 12, 2026	£25.00	CONFIRMED	Download Certificate

CERTIFICATE OF APPRECIATION

CharityHub Foundation

This certificate is proudly presented to

Youssef Abdelhakam Gamal

in profound recognition of your generous contribution of

£100.00

towards the **Help SUT** campaign.

Your support brings hope and lasting change. Thank you for making a difference.

Volunteering

- **Navigate to the Volunteer Portal from the main menu.**
- Browse available shifts by campaign, date, and location.
- Click Sign Up for a shift — the system automatically checks for scheduling conflicts.
- After completing a shift, your hours are logged and visible on your public donor profile.

2.2 Admin Operations Manual

The CharityHub admin panel is built on Filament and is accessible at /admin. This section covers daily operations for platform administrators.

Admin access is role-restricted. Only users with the admin role (managed via Spatie) can access /admin.

Logging In to the Admin Panel

7. Navigate to YOUR_APP_URL/admin in your browser.
8. Enter your admin email and password.
9. The Filament dashboard will load with your resource sidebar.

Filament Admin Panel — Dashboard Screenshot

Campaign Management

- **Go to Campaigns in the sidebar to view all campaigns.**
- Click New Campaign to create an initiative. Required fields: title, description, goal amount, end date.
- Upload a cover image and assign a cause category.
- Toggle campaign status between Active, Paused, and Completed.
- View real-time fundraising progress and donor count per campaign.

Admin — Campaign Management Screenshot

The screenshot shows the CharityHub Admin Panel. The sidebar on the left contains navigation links: Welcome Admin User, Dashboard, Impact Reports, User Management (Roles, Users), Volunteers, and Campaign Management (Campaigns). The main content area is titled 'Campaigns' and features a 'New campaign' button. Below the title is a table with the following data:

Title	Status	Goal	Raised	Progress	End date	Donations	
Help SUT	active	£1,000.00	£175.00	17.5%	May 30, 2026	4	Edit View
Emergency Disaster Relief	closed	£10,000.00	£100,047.00	100%	Jul 9, 2026	3	Edit View
Education for All	active	£25,000.00	£20,150.00	80.6%	May 15, 2026	8	Edit View
Clean Water Initiative	active	£50,000.00	£14,550.00	29.1%	May 30, 2026	9	Edit View

At the bottom of the table, it says 'Showing 1 to 4 of 4 results' and 'Per page 10'.

Volunteer Management

- **Go to Volunteers to view all registered volunteers and their shift histories.**
- The system prevents double-booking — conflicts are flagged automatically.
- Admins can manually approve or reject volunteer applications per campaign.

Impact Reports

- **Once a campaign concludes, go to Impact Reports → New Report.**
- Enter beneficiary statistics, outcome narrative, and upload supporting media.
- Pin a GPS location for the campaign — this renders on the public donor-facing map.
- Publish the report to make it visible to donors on the campaign page.
- Export reports to PDF directly from the action menu.

Section 3 — Compliance & Security Notes

This section documents CharityHub's approach to financial data security (PCI-DSS alignment) and data privacy compliance (GDPR). These practices are baked into the platform architecture, not added as afterthoughts.

3.1 Financial Data Handling — PCI-DSS Alignment

Control	Implementation in CharityHub
Zero Card Storage	CharityHub never stores card numbers, CVCs, or expiry dates. All payment data is tokenized by Stripe.
Stripe Tokenization	Stripe Elements / Stripe.js collects card data in an isolated iframe. Raw card data never touches CharityHub servers.
Idempotency Keys	Every payment request includes a unique UUID idempotency_key. Retries and double-clicks cannot produce duplicate charges.
Webhook Verification	All Stripe webhooks are validated against STRIPE_WEBHOOK_SECRET before any business logic executes.
Immutable Ledger	Confirmed donations create a LedgerEntry immediately. This table is write-once — no updates or deletes are permitted.
HTTPS Only	All traffic is forced to HTTPS. HTTP requests are redirected at the server level.
Test Mode Isolation	Stripe is configured in Test (Sandbox) Mode. Live keys must never be committed to version control.

⚠ Never commit STRIPE_SECRET_KEY or STRIPE_WEBHOOK_SECRET to Git. Store them in .env and add .env to .gitignore.

3.2 GDPR Compliance Considerations

CharityHub handles personal data of donors and volunteers, including names, email addresses, and financial transaction records. The following principles are implemented throughout the platform.

GDPR Right / Principle	Implementation
Lawful Basis	Donations are processed under contract (donor initiates transaction). Marketing requires explicit consent.
Data Minimization	Only data strictly required for donation processing and tax certificates is collected. No superfluous PII.
Explicit Consent	Opt-in checkboxes at checkout for marketing emails and impact report updates. Pre-ticked boxes are not used.
Right to Access	Donors can view and download all their data from their dashboard at any time.
Data Portability	Full export of donation history, certificates, and volunteer hours available via Dashboard → Data Export.
Right to Erasure	EraseUserDataJob anonymizes LedgerEntry records (for financial reporting) and hard-deletes all PII.
Data Retention	Financial records (ledger entries) are retained for 7 years per accounting law. PII is erased on request.
Breach Notification	In the event of a data breach, affected users and the relevant supervisory authority must be notified within 72 hours.
Data Processor	Stripe is a certified data processor under a Data Processing Agreement (DPA). Donors' payment data is governed by Stripe's privacy policy.

Right to Erasure — Technical Flow

When a donor requests account deletion, the following steps execute via EraseUserDataJob:

- Donor submits deletion request from Dashboard → Settings → Delete Account.
- System queues an EraseUserDataJob for that user ID.
- Job anonymizes all LedgerEntry records associated with the user (replaces name/email with DELETED_USER).
- Job hard-deletes the users record including name, email, and profile data.
- Associated donations retain anonymized references for audit trail continuity.
- Any active Stripe subscriptions are cancelled via the Stripe API before deletion.

Cookie & Tracking Policy

- Session cookies are used for authentication only — strictly necessary, no consent required.**
- No third-party advertising trackers are embedded in the platform.
- Google Maps is used for impact report location rendering — subject to Google's privacy policy.

- A cookie consent banner is displayed on first visit for analytics cookies (if applicable).
